

Summer 2019 Workshop in the Responsible Conduct of Research

This session will help students become acquainted with key ethical issues involved in the responsible conduct of research. The workshop will address ethical data sharing and management, authorship, relationships with mentors and colleagues, research misconduct, conflicts of interest, and research ethics in society. Ethics in research involving human or animal subjects will be introduced. The focus will be on research by undergraduate students, but all students, faculty, and staff are welcome to participate.

*** Wednesday, June 5, 2019**
12:00–4:00 pm
ITTC 228

To Register, email anita.gordon@uni.edu
